

Masterclass in Imaging of Pancreatic Tumours

Thursday 3rd November 2016

Euston House, 24 Eversholt Street, London, NW1 1AD
Opposite Euston Station

This Masterclass in the Imaging of Pancreatic Tumours is a one-day teaching course which will highlight current imaging techniques, image interpretation and pitfalls in the evaluation of solid and cystic pancreatic tumours. Workshop-style teaching with individual imaging workstations in small groups will afford participants the opportunity to learn through hands-on, case-based learning, in addition to didactic lectures.

The course is limited to 20 participants per classroom, with two parallel workshops running concurrently. Each 1.5 hour session will commence with a lecture followed by the opportunity to work through cases included in a workbook, with some cases being presented to the group and some for individual interpretation.

The faculty comprises four experts in abdominal imaging who will each focus on a particular aspect to provide practical and relevant information on pancreatic imaging. This includes cystic pancreatic tumours, staging and follow-up of pancreatic carcinoma, pancreatic neuroendocrine tumours and pancreatic masses which can mimic malignancies.

CPD accreditation by the Royal College of Radiologists has been applied for and a certificate of attendance will be given to all participants.

We gratefully acknowledge the support of Guerbet for this course.
