This Masterclass is a one-day work-station based teaching course, which will highlight the application of WB-MRI in cancer. This course is designed for radiologists interested to learn the daily application of WB-MRI in clinical practice. With modules on disease screening, myeloma, breast and prostate cancers, attendees will become familiar with the emerging roles of the technique for cancer management. Our expert teachers have extensive clinical experience of WB-MRI, will provide image interpretation guidance, as well as showing benefits for both precision health and oncology.

Learning objectives

- To provide a rationale for the use of WB-MRI for maintaining health via early detection and disease characterisation.
- To discuss the application and benefits of WB-MRI in prostate cancer.
- To discuss the application and benefits of WB-MRI in multiple myeloma.
- To discuss the application and benefits of WB-MRI in breast cancer.

Key Features

- Mentored case-based learning of 35 – 40 cases
- Each case chosen to illustrate specific learning points
- Detailed workbook and course material to take home
